## SpreadsheetGear Releases New Version of Microsoft Excel Compatible Spreadsheet Component for ASP.NET and Windows Forms

**LENEXA, KS, June 12<sup>th</sup>, 2007** - Today, SpreadsheetGear LLC announced the immediate availability of SpreadsheetGear for .NET 2007, a royalty free Microsoft Excel compatible spreadsheet component built by industry veterans for any Microsoft .NET Framework solution. SpreadsheetGear for .NET 2007 features the fastest and most complete Excel compatible calculation engine as well as rich Windows Forms Spreadsheet Controls, giving Microsoft .NET developers the ability to create, read, modify, view, edit, format, calculate, print and write Microsoft Excel workbooks without Excel.

“SpreadsheetGear for .NET 1.0 enabled developers to deliver richly formatted Excel reports, evaluate complex Excel based models and business rules, as well as dynamically move data and formatting between Excel workbooks and virtually any other form. SpreadsheetGear for .NET 2006 built upon this solid foundation with rich Windows Forms spreadsheet controls. SpreadsheetGear for .NET 2007 adds a number of the most frequently requested features including conditional formats, grouping and outlining, find and replace, sorting, a Visual Basic version of our SpreadsheetGear Explorer Sample Solution and more, enabling developers to easily deliver full featured spreadsheet functionality to their users,” according to Terry Erickson, Chief Software Architect, SpreadsheetGear LLC.

### SpreadsheetGear Delivers Performance, Flexibility and Priceless Support

"We started to use SpreadsheetGear for .NET almost two years ago when the performance of other controls was becoming problematic. We needed a control that could handle large workbooks with complex formulas to be able to apply Monte Carlo simulation to financial statements," said Frédéric Faucher, Analyste Financier at Solutions Modex Inc. "Since that time SpreadsheetGear for .NET has become our tool of choice not only for the performance but also for the flexibility. But most of all, the technical support we receive from SpreadsheetGear LLC is priceless; it has always been fast and accurate with the vision to arrive at the desired solution."

"We have enjoyed significant growth in revenue and profitability every quarter since releasing SpreadsheetGear for .NET 1.0 almost two years ago, and we remain committed to delivering the most reliable, most scalable and highest performance spreadsheet technology backed up by the highest quality of customer support," said Joe Erickson, Founder and CEO, SpreadsheetGear LLC.
